

Press release: June 27th, 2018

The Nuclear Quality Standard Association (NQSA) is pleased to announce that ROSATOM, represented by JSC Atomenergoprom, joined the Nuclear Quality Standard Association.

The state corporation ROSATOM, represented by JSC “Atomenergoprom”, has joined the Nuclear Quality Standard Association. The corresponding document was signed within the framework of the World Nuclear Exhibition in Paris.

On the Russian side, the document was signed by Kirill Komarov, the first deputy general director - director of the Development and International Business Block of ROSATOM, from the side of NSQA the document was signed by Thierry Zumbihl, president of the Association, and Laurent Kueny, general secretary of the Association.

As a full member of the association, ROSATOM will be able to participate in the improvement of the international quality management standards in the nuclear industry and to help with their implementation.

"Joining NQSA proves the need for Russian experience in the field of quality management in the nuclear industry at the world level. ROSATOM gained the opportunity to influence the creation of uniform industry standards and requirements," said Kirill Komarov.

"ROSATOM's membership in the Association will have a positive impact on supporting the development and implementation of internationally recognized standards in the nuclear industry," said Thierry Zumbil.
